

How to ReOpen/Change Status of a Closed Service Record

Market: Federal/State/Local, House, Senate

Module: Services

Purpose: This guide provides instructions on how to re-open or change the status of a closed service record.

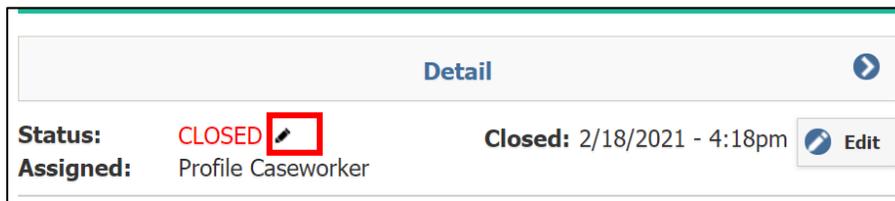

Key Benefits

Although IQ provides the option to reopen a closed service record, is not a recommended best practice and should only be used in special circumstances. Changing the status does not re-open a service record but simply changes the type of closing status set for the record.

1. Navigate to **Services > All Recently Closed**.

2. Select the service record.
3. Click the **Pencil** icon next to **CLOSED**.

4. Select the appropriate option.

Reopen Service or Change Closed Status		
Reopen Service	Change Status	Cancel

Option – Reopen a Service. This reopens the service record. Modify the record information and close the record when the process is complete.

Option – Change Status. This displays a window that lists the different types of closing statuses. Select the new closing status.
